

The dot plot displays the distribution of two groups, 'sensitive' and 'tolerant', across 10 levels of a categorical variable. The y-axis represents the levels, and the x-axis represents the groups. Red dots indicate the 'sensitive' group, and teal dots indicate the 'tolerant' group. The plot shows that the 'tolerant' group has a higher frequency in the top levels, while the 'sensitive' group has a higher frequency in the bottom levels.

Level	sensitive	tolerant
1	1	2
2	2	2
3	1	1
4	3	4
5	3	1
6	0	1
7	2	2
8	2	1
9	3	4
10	2	3

-  sensitive
-  tolerant
